✓ file:///E:/PROJECT/PhpV6/src/test/resources/Features/Admin.feature

Feature: Admin Back-End Functionality

Background:

- ✓ **Given** user launch Chrome Browser
- ✓ **When** user opens url "https://www.phptravels.net/admin"

Scenario Outline: Admin login with invalid credentials

- ✓ **When** user enters Email as "<email>" and Password as "<password>"
- ✓ **And** click on Login
- ✓ **Then** user should get an Error message "<message>"
- ✓ **And** Page Title should be "Administator Login"
- ✓ **Then** Close Browser

Examples:

	email	password	message
✓	admin@phptravels.com	abcd	Invalid Login Credentials
✓	adminphptravels.com	demoadmin	The Email field must contain a valid email address.
✓		demoadmin	The Email field is required.
✓	admin@phptravels.com		The Password field is required.

Scenario: Admin login with valid credentials

✔ **When** user enters Email as "admin@phptravels.com" and Password as "demoadmin"

✔ **And** click on Login

✔ **Then** Page Title should be "Dashboard"

✔ **And** Close Browser

Scenario: Test the link booking and then test the display of Booking invoice where payment is successful

✔ **Given** user is on Admin Dashboard

✔ **And** user click on Booking link

✔ **Then** Page Title should be "All Bookings View"

✔ **And** user check for booking invoice where payment is successful

✔ **Then** Close Browser

Scenario: Admin change the booking status from pending to confirmed and verifying the count in dashboard

✔ **Given** user is on Admin Dashboard

✔ **And** user click on Booking link

✔ **Then** user select a record having booking status as Pending and change it to Confirmed

✔ **And** user verify the count in dashboard

✔ **Then** Close Browser

Scenario: Admin delete a record having booking status as Cancelled

✔ **Given** user is on Admin Dashboard

✔ **And** user click on Cancelled booking link

✔ **Then** Page Title should be "cancelled Bookings View"

✔ **Then** user delete the record having booking status as Cancelled

✔ **Then** Close Browser

Scenario: Verifying Website link functionality

✔ **Given** user is on Admin Dashboard

✔ **And** user click on Website link

✔ **Then** Close Browser

⌄ ✔ file:///E:/PROJECT/PhpV6/src/test/resources/Features/AgentFront-End.feature

Feature: Agent Front-End Functionality

Background:

✔ **Given** user launch chrome browser

✅ **When** user opens URL "https://phptravels.net/login"

Scenario Outline: Agent login with invalid credentials

✅ **When** user enters email as "<email>" and password as "<password>"

✅ **And** click on login

✅ **Then** user should get an error message

✅ **And** Page title should be "Login - PHPTRAVELS"

✅ **Then** Close browser

Examples:

	email	password	
✅	abc@gmail.com	demoagent	
✅	agent@phptravels.com	agentdemo	
✅	agentphptravels.com	abcde	

Scenario: Agent login with valid credentials and verifying Logout functionality

✅ **When** user enters email as "agent@phptravels.com" and password as "demoagent"

✅ **And** click on login

✅ **Then** Page title should be "Dashboard - PHPTRAVELS"

✅ **When** user click on logout link

✅ **Then** Page title should be "Login - PHPTRAVELS"

✅ **And** Close browser

Scenario: Verifying My Booking Functionality

✅ **Given** user is on Agent Dashboard

✅ **And** user check for My booking icon and click on it

✅ **Then** Page title should be "Bookings - PHPTRAVELS"

✅ **Then** Close browser

Scenario: Verifying Add Funds Functionality

✅ **Given** user is on Agent Dashboard

✅ **And** user check for Add Fund icon and click on it

✅ **Then** Page title should be "Add Funds - PHPTRAVELS"

✅ **Then** Close browser

Scenario: Verifying My Profile Functionality

✅ **Given** user is on Agent Dashboard

✅ **And** user check for My Profile icon and click on it

✅ **Then** Page title should be "Profile - PHPTRAVELS"

✅ **Then** Close browser

Scenario Outline: Check for Hotel link and search hotel by city

✅ **Given** user is on Agent Dashboard

✅ **And** user check for Hotel icon and click on it

✅ **Then** Page title should be "Search Hotels - PHPTRAVELS"

✅ **And** user search hotel by city "<city>"

✅ **Then** Page tile should be "<page title>"

✅ **Then** Close browser

Examples:

	city	page title	
✅	dubai	Hotels in dubai - PHPTRAVELS	

Scenario: Check for Flight link

✅ **Given** user is on Agent Dashboard

✅ **And** user check for Flight icon and click on it

✅ **Then** Page title should be "Search flights - PHPTRAVELS"

✅ **Then** Close browser

Scenario: Check for Tours link

✅ **Given** user is on Agent Dashboard

✅ **And** user check for Tour icon and click on it

✅ **Then** Page title should be "Search Tours - PHPTRAVELS"

✅ **Then** Close browser

Scenario: Check for Visa link

✅ **Given** user is on Agent Dashboard

✅ **And** user check for Visa icon and click on it

✅ **Then** Page title should be "Submit Visa - PHPTRAVELS"

✅ **Then** Close browser

Scenario: Check for Blog link

✅ **Given** user is on Agent Dashboard

✅ **And** user check for Blog link and click on it

✅ **Then** Page title should be "Blog - PHPTRAVELS"

✅ **Then** Close browser

Scenario: Check for Offers link

✅ **Given** user is on Agent Dashboard

✅ **And** user check for Offers link and click on it

✅ **Then** Page title should be "Offers - PHPTRAVELS"

✅ **Then** Close browser

Scenario: Verifying whether it is possible to convert USD to INR amount

✅ **Given** user is on Agent Dashboard

✅ **And** user click on USD link a dropdown menu is shown

✅ **Then** user select INR from the dropdown menu

✅ **Then** Close browser

∨ ✅ file:///E:/PROJECT/PhpV6/src/test/resources/Features/CustomerFront_End.feature

Feature: Customer Front-End Functionality

Background:

✅ **Given** user launch chrome browser

✅ **When** user opens URL "https://phptravels.net/login"

Scenario Outline: Customer login with invalid credentials

✅ **When** user enters email as "<email>" and password as "<password>"

✅ **And** click on login

✅ **Then** user should get an error message

✅ **And** Page title should be "Login - PHPTRAVELS"

✅ **Then** Close browser

Examples:

	email	password
✅	abc@gmail.com	demouser
✅	user@phptravels.com	userdemo
✅	userphptravels.com	abcde

Scenario: Customer login with valid credentials and verifying Logout functionality

✅ **When** user enters email as "user@phptravels.com" and password as "demouser"

✅ **And** click on login

✅ **Then** Page title should be "Dashboard - PHPTRAVELS"

✅ **When** user click on logout link

- ✅ **Then** Page title should be "Login - PHPTRAVELS"
- ✅ **And** Close browser

Scenario: Verifying MY BOOKING functionalities and check whether customer can view the voucher

- ✅ **When** user is on customer dsahboard
- ✅ **And** click on MY BOOKING icon
- ✅ **Then** Booking Page title should be "Bookings - PHPTRAVELS"
- ✅ **When** user click on view voucher button
- ✅ **Then** user able to see booking invoice
- ✅ **And** Close browser

Scenario: Verifying Add funds functionalities and check whether customer can make a payment of USD50

- ✅ **When** user is on customer dsahboard
- ✅ **And** user Click on ADD FUNDS icon in the Dashboard
- ✅ **Then** Page title should be "Add Funds - PHPTRAVELS"
- ✅ **And** user make a payment of USD50
- ✅ **And** Close browser

Scenario: Verifying MY PROFILE functionality and check whether customer can update address in the profile

- ✅ **When** user is on customer dsahboard
- ✅ **And** user Click on My Profile icon in the Dashboard
- ✅ **Then** Page title should be "Profile - PHPTRAVELS"
- ✅ **And** user update address in the profile
- ✅ **Then** user get a message as "Profile updated successfully."
- ✅ **And** Close browser

✅ file:///E:/PROJECT/PhpV6/src/test/resources/Features/SuplierBack_End.feature

Feature: Supplier Back-End Functionality

Background:

- ✅ **Given** user launch Chrome Browser
- ✅ **When** user opens url "https://www.phptravels.net/supplier"

Scenario Outline: Supplier login with invalid credentials

- ✅ **When** user enters Email as "<email>" and Password as "<password>"
- ✅ **And** click on Login
- ✅ **Then** user should get an Error message "<message>"

✅ **And** Page Title should be "Supplier Login"
✅ **Then** Close Browser

Examples:

	email	password	message	
✅	supplier@phptravels.com	abcd	Invalid Login Credentials	
✅	supplierphptravels.com	demosupplier	The Email field must contain a valid email address.	
✅		demosupplier	The Email field is required.	
✅	supplier@phptravels.com		The Password field is required.	

Scenario: Supplier login with valid credentials

✅ **When** user enters Email as "supplier@phptravels.com" and Password as "demosupplier"
✅ **And** click on Login
✅ **Then** Page Title should be "Dashboard"
✅ **And** Close Browser

Scenario: Check whether the dashboard contains SALES OVERVIEW AND SUMMARY

✅ **Given** user is on Supplier Dashboard
✅ **And** user able to see "Sales overview & summary"
✅ **And** Close Browser

Scenario: Check whether the dashboard contains REVENUE BREAKDOWN

✅ **Given** user is on Supplier Dashboard
✅ **And** user check for "Revenue Breakdown 2023"
✅ **And** Close Browser

Scenario: Check for Tours Module

✅ **Given** user is on Supplier Dashboard
✅ **And** user check for Tours module
✅ **And** user click on Manage Tours
✅ **And** Close Browser
